

Announcement: Development of Prototype “Trackless Dark Ride” is Completed

Sansei Technologies, Inc. (Main office: Yodogawa-ku, Osaka City, President & CEO: Noboru RACHI) has completed the development of “Trackless Dark Ride”.

The Trackless Dark Ride is a ride system that individual vehicle can be driven independently using a pre-set performance program and course layout/run route. The performance program and course layout are customizable according to requests from the customer. It can also be equipped with other onboard devices including audio, lighting, and interactive system such as shooting game. The vehicle features high mobility of 1m rotation radius, allowing the ride to run any course that fits into the given footprint, regardless of whether the building is existing or new.
